

M'START

THE BEGINNING

IMAGE

ROCKET FAIRING

The bold design of the Rocket front and rear fairing makes the top half of the rollover really stand out, giving the unit an air of strength as well as making it look more appealing.

PLAIN FAIRING

Functional fairing for the top half of the columns to match the design of the doors. Its geometrical shapes give it a robust and simple appearance which is in character with the overall design of the machine.

NEW PICTOGRAMS

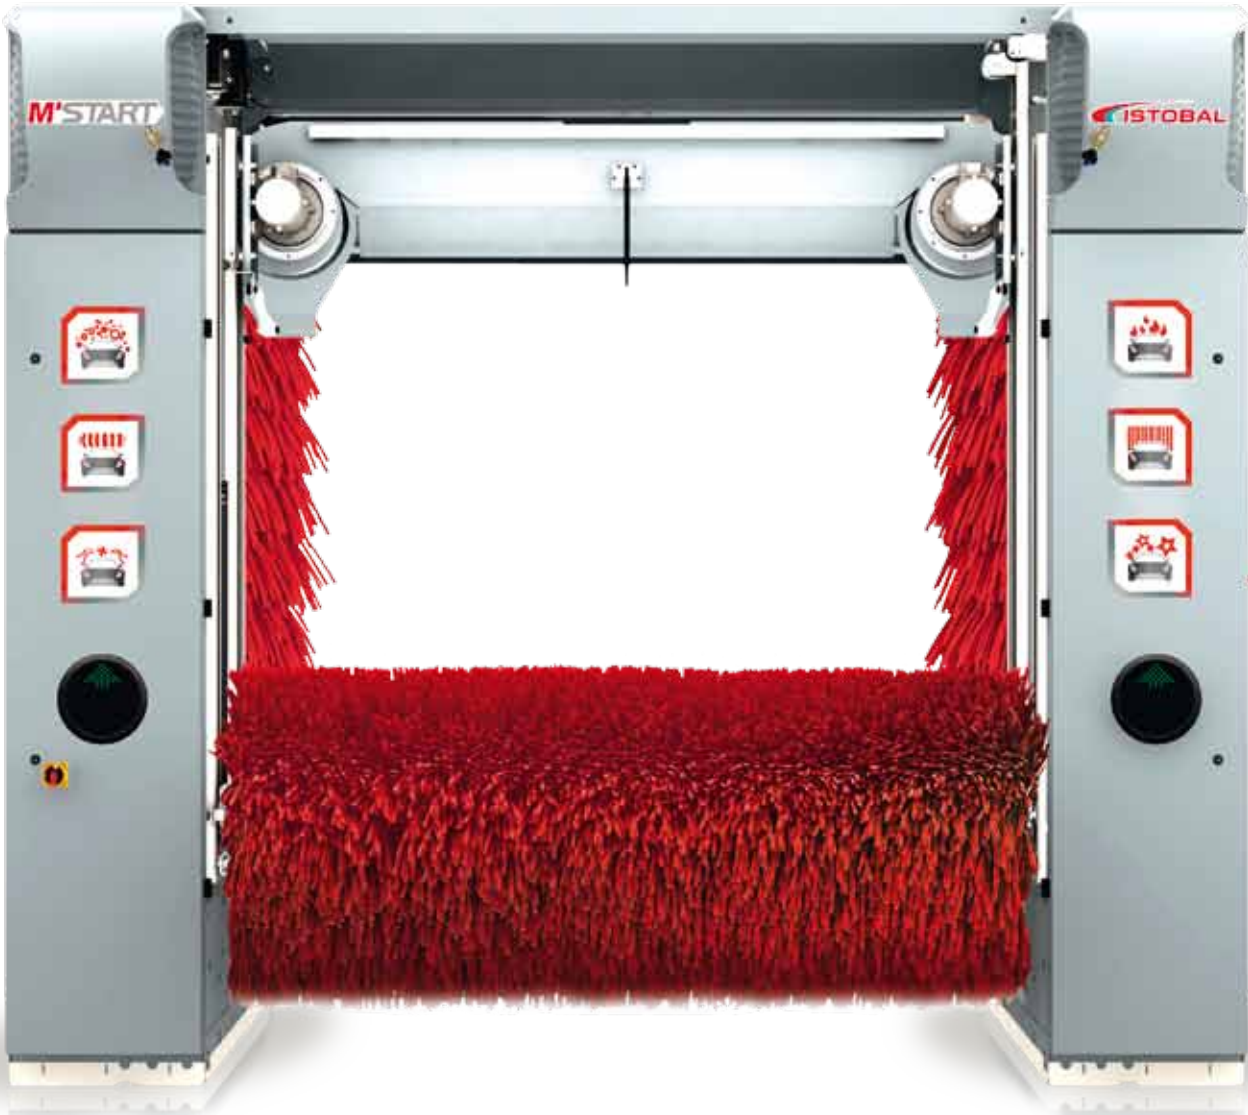

The stickers for the **Silver** pictograms and the vinyl **Hexa** in their different versions fit round the optional decorative **Sferic** lighting to give the machine a more modern and innovative image in harmony with the rest of the design.

M'START

Everything has a beginning and that is why with the new **M'START** we have decided to go back to first principles: simple design, ease of assembly and a sober image but with the appeal, durability and technological features expected of a 21st century wash machine.

M'START is a rollover designed for wash facilities with a capacity of 400 to 1200 vehicles a month and is the perfect machine for those wishing to start off in the vehicle wash business in the most profitable way.

| WASH DIMENSIONS | | | |
|-------------------------|-------|-------|--------|
| WASH HEIGHT | 2.300 | 2.500 | 2.700 |
| WASH WIDTH | 2.400 | 2.400 | 2.400 |
| LENGTH OF RAILS | 9.000 | 9.000 | 10.000 |
| MINIMUM MACHINE WIDTH* | 3.800 | 3.800 | 3.800 |
| MAXIMUM MACHINE WIDTH** | 4.212 | 4.212 | 4.212 |
| TOTAL MACHINE HEIGHT | 3.083 | 3.313 | 3.513 |

* Includes energy chain
** Includes energy chain + optional splash screens
All measurements in mm.

FEATURES

EFFECTIVE DRYING

Dryer 13.6 kW (2 x 3.8 kW + 2 x 3 kW) with horizontal dryer nozzle plus vehicle scanning and optional diffuser to achieve a better dry on the rear of the vehicle. As an alternative, we have two 4 kW turbofans fitted to the top of the machine to perform the dry with no need for scanning.

ON BOARD HIGH PRESSURE

The innovative “on board” system of the **M'START** has the high pressure pump fitted inside the column. This means various high pressure options are available without the high extra cost involved in installing this type of pump externally in the technical room of the wash facility.

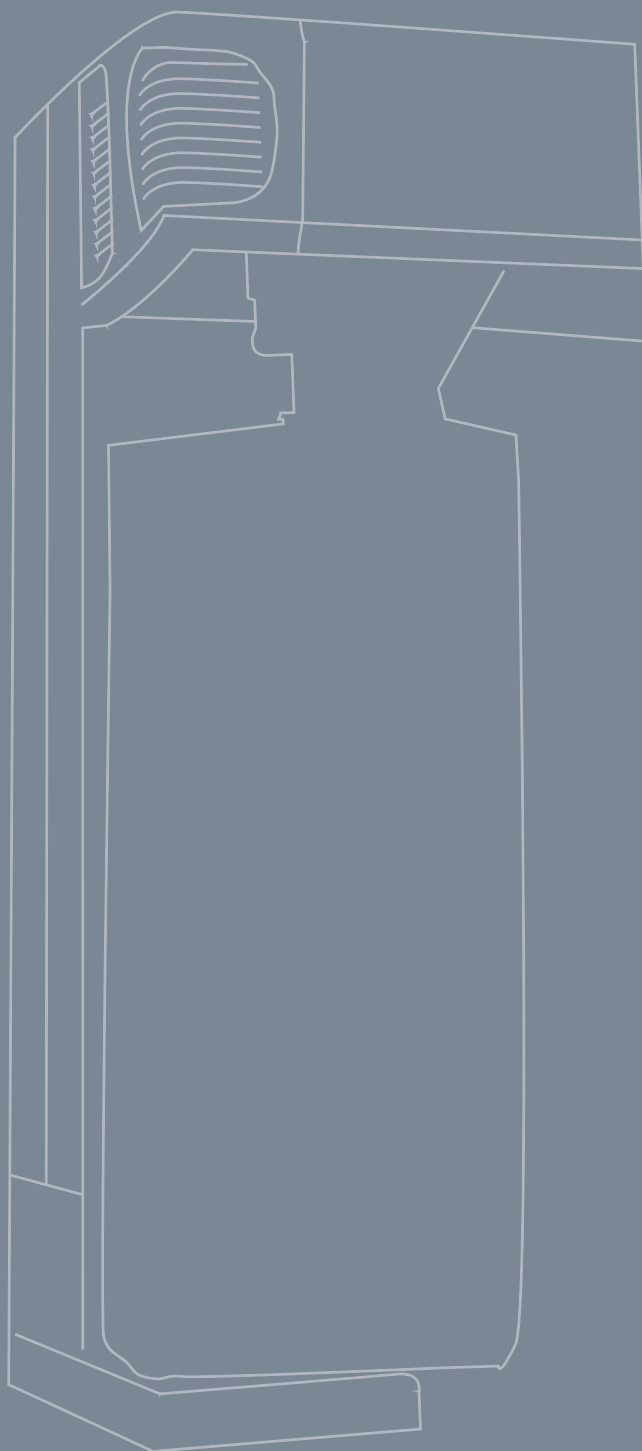

A MULTITUDE OF OPTIONS

High shine wax with polish, foam, chemical prewash and wheelwash, are just a few of the options available for equipping your **M'START** rollover. With them, you can offer a gentle but effective wash and high quality wash programs with a reduced water consumption.
