

M'NEX 25H

The Real Hybrid Machine

M'NEX 25H, our most complete model

We present the new M'NEX 25H, the most versatile double rollover on the market. In addition to the flexibility already offered by the two independent modules of the M'NEX 25, we have added a new high pressure system with rotating nozzles (80 Bar – 84 l/m). The result is a gentle yet accurate brushless wash capable of reaching every corner.

Essential to this system are the total of 26 rotating nozzles found on the oscillating side unit and the rotating horizontal system. The internal mechanism of these nozzles concentrates all the power and speed into one single jet of water which spins at high speed forming a clearly-defined cone shape which washes all of the dirt off the vehicle.

Additionally, the optional 80 Bar high pressure wheelwash with 3 rotating nozzles can be added to give a unique clean even on the most difficult of rims.

M'NEX 25H

WASH COMBINATIONS M'NEX 25H

BRUSHLESS WASH

Different types of chemical prewash are available which act on the dirt ground onto the vehicle thus helping the high pressure system achieve a more effective clean. The 5-position horizontal high pressure system ensures that every last corner of the vehicle is reached. The two most horizontal positions target the front and rear of the vehicle directly, thus achieving optimum results.

COMBINED WASH

The perfect wash for even the most demanding customers is achieved by the combined action of the new oscillating/rotating high pressure system and our Link-it® system brushes. The process ends with the well-known drying quality of the M'NEX range, which gets even better on this model thanks to the individual dryer module.

HIGH SHINE WAX

For real connoisseurs, we can top off any of these options with a special high shine wax bath, which is then massaged in by the brushes, offering exceptional protection and shine to the paintwork of the vehicle.

WASH DIMENSIONS

WASH HEIGHT	2.300	2.500				2.700	
WASH WIDTH	2.500	2.500		2.700		2.500	2.700
LENGTH OF RAILS	11.000	11.000	12.000	11.000	12.000	12.000	12.000
MINIMUM MACHINE WIDTH*	4.058	4.058	4.058	4.258	4.258	4.058	4.258
MAXIMUM MACHINE WIDTH**	4.312	4.312	4.312	4.512	4.512	4.312	4.512
TOTAL MACHINE HEIGHT	3.100	3.300	3.300	3.300	3.300	3.500	3.500

* Includes energy chain

** Includes energy chain + optional splash screens
